Node JS	Next JS	React JS
Git	MySQL	MongoDB
Express JS		Figma

Profile

Front End Web Developer with 2+ years of experience, in website development and other experiences such as design, UI experience, debugging, optimizing a website. I always prioritize working professionally and being able to work independently, the ability to easily adapt to the latest technology in the website development environment, always learning all the time makes it easier for me to implement the latest technology for the next project.

Experience

I don't have work experience, but I have experience creating a project that is similar to web developer work.

- create a website that is responsive on all devices and increase website loading speed on devices.
- create a gadget-themed online shop website, using the MongoDB database, working on all parts of this website starting from design, design, technology used, frontend and backend.
- always ensure the project is running well, write code that is clean and easy to maintain and if you want to update.
- develop websites using modern technologies such as reactJS, and handle debugging, bug fixes, and improve site functionality regularly.
- Implement API and database integration to improve user interaction and data management.
- Transforming UI/UX designs into responsive HTML, CSS and JavaScript code, Developing websites based on design Mockups with precision and consistency, I also Transforming design elements into dynamic layouts that comply with web development standards
- Designed and implemented database structures for websites using MySQL and MongoDB.
